A taxi cannot carry more than

4 passengers besides the driver

5 passengers besides the driver

9 passengers besides the driver

no specific number of passengers is specified, each taxi car being able to transport a number of passengers according to its capacity

What will you do when you notice the raised arm signal made by the police officer in the middle of the intersection?

if you receive the signal when you are already at the cross-roads, continue your journey

reduce speed and continue driving with increased caution

respect the traffic lights at the cross-roads and ignore the policeman's signals

stop in the middle of the cross-roads in front of the police officer

On the front doors of the taxi car the following applies:

distance tariff values (lei/km), applied during the day and at night

the badges with the serial number of the authorization or of the certified copy, as the case may be

the number of the operating authorization issued by the local public administration authority

the number of the taxi car's approval certificate

The dimensions of the inscriptions on the front doors of taxi cars will be set so that they are visible from:

from 5 meters away, in low visibility conditions

from 5 meters, at night

from a minimum of 5 meters, with the obligation for the inscriptions to be fluorescent for increased visibility at night

from at least 5 meters

Vehicles approved by the Romanian Automobile Registry - RAR, as taxis, can transport:

maximum 5 passengers besides the driver

minimum 4 passengers besides the driver

no more than 4 passengers besides the driver

there are no provisions in this regard, taxis can transport a number of passengers corresponding to the capacity of the vehicle

For the purposes of Law no. 38/2003 the term taxi driver is defined as follows:

any driver holding a category B license

driver, employee of a company that provides public transport services by taxi

natural person, holder of a category B license

professionally certified driver to provide taxi transport

How does speed influence stopping space?
when doubling the speed, the stopping space does not change its values
when the speed doubles, the stopping space doubles
when the speed doubles, the stopping space increases four times
when the speed doubles, the stopping space increases three times

---

Approval certificates for taxi cars are issued upon request and are valid:
1 year
10 years with annual visa
3 years with annual visa
5 years with annual visa

Factors that contribute to the depreciation of driving ability are:
fatigue, alcohol, medications, drugs, stress, vision impairment over time
just fatigue
just stress
vision impairment over time

At the same time as the taxi authorization and the certified copies, the following are issued:
taxi dispatcher authorization
the contract for the assignment of management of the execution of taxi transport services
two badges valid for one year
two badges with the same validity as the authorization and the compliant copies

---

Taxis are prohibited from:
transport between the city/village of authorization and another city/village
transport of more than one customer on a single trip, in the sense of a single payer, not of the passengers
transport over a distance that will result in a very small customer receipt
transport over very long distances

The switching speed provided by the taximeter device must be:
10 km/hour
12 km/hour
15km/hour
20 km/hour

The electronic key is used for:
identification of the taxi car
identification of the taxi company or independent taxi driver
opening the taxi car
scheduling the fares and identifying the taxi driver

When passing through undirected cross-roads outside the city/village, the speed must be:

30 km/h
40 km/h
50 km/h
since there is no regulated speed limit, it must be reduced to the limit of avoiding any danger

---

The speed of travel at night must be chosen so that:

the dipped headlights should not disturb those driving in the opposite direction
to allow the vehicle to stop as quickly as possible
to allow the vehicle to stop within a maximum of 10m
to allow the vehicle to stop within the field of vision

The taxi authorization or any certified copy are:

can be changed upon request into authorizations and certified copies for the carriage of goods
transmissible from one transport operator to another
transmissible from one vehicle to another
unique and non-transferable

It is considered an infringement and applies to taxi drivers:

not to present the taximeter device on time, after installation on the taxi car, at the first metrological check, as well as subsequently at the due dates
not to provide, at the request of the authorities with control powers, information regarding the transport activity carried out
performing a taxi transport with a faulty taximeter device or with a taxi lamp out of order
to perform other categories of public transport than taxi, with approved taxi cars and having their own personalization and identification signs

---

The minimum age for drivers who transport passengers in a taxi is:

18 years old
19 years old
21 years old
22 years old

Factors that influence braking distance:

only the speed of travel
road surface adhesion and speed
speed, vehicle mass, grip
tire size and profile

If the authorized carrier or taxi driver uses the taxi for other purposes than taxi transport, the vehicle may be driven:

with the taximeter device in the busy position and the taxi lamp in the same position

with the taximeter device in the free position and the taxi lamp covered with a cover
with the taximeter device in the free position and the taxi lamp in the same position
with the taximeter device in the free position and the taxi lamp removed from the dome

Up to what percentage can the night-time distance ratebe increased compared to the daytime distance fee?
0.3
0.4
0.5
1

If the taxi driver does not hold a certificate of professional competence or the certificate obtained has expired, the taxi authorization or any other certified copy may be:
suspended for a period of 1 to 3 months
suspended for a period of 30 days
suspended until the deficiencies are remedied
withdrawn

The taxi driver's report is:
activity report sent to the dispatcher
non-fiscal control report
receipts report issued at the end of the activity
tax report

The elements of preventive management are:
only foresight and judgment
only vigilance and foresight
vigilance and skill
vigilance, foresight, judgment

The seal applied to the taximeter in order to prevent access to privileged operations without unsealing is:
electronic fiscal memory
metrological seal
protective seal
tax seal

How will be a driver punished if leaves the scene of an accident where a person was injured?
with a criminal fine
with imprisonment and cancellation of driving license
with imprisonment and suspension of driving license
withholding the driving license and applying penalty points

On a normal road at a speed of 100 km/h the braking distance is approximately:
100 m
150 m
50 m
80 m

When overtaking, signaling with flashing lights is done:
from the beginning of the maneuver until its end
from the beginning of the maneuver until its end only in places with reduced visibility
only to signal the intention to overtake and the engagement in overtaking
only to signal the intention to overtake, the engagement in overtaking and the actual overtaking-doubling

According to Law no. 38/2003 public transport services in the taxi regime are part of:

the retail sector
the sphere of community services of public utility
the sphere of home services
the sphere of national transport

Taxis are prohibited from:
parking in customer waiting areas located in a city/village other than the city/village of authorization that issued the taxi authorizations
parking in places permitted for vehicles
parking near a cross-roads with high traffic volume
stationing in customer waiting areas

The certificate of professional competence is valid:
in Romania and in countries with which Romania has an agreement concluded in this regard
in the geographical area of the authority that issued the certificate
on EU territory
on the territory of Romania

Which of the following options corresponds to the definition of the term "taxi" in accordance with the provisions of Law no. 38/2003:
any means of transport that allows the transport of passengers
goods transport vehicle whose payload does not exceed 3.5 tons
vehicle in the passenger car category with up to a maximum of 5 seats including the driver's seat
vehicle with up to a maximum of 10 seats including the driver's seat

Which of the following is not considered an authorized taxi operating position?
free

occupied
outside of work
payment

The lamps indicating the vacant position and the occupied position must be visible from a distance of:
100 meters
30 meters
50 meters
70 meters

You are in a race with a customer. Due to heavy traffic, you are driving at a speed of less than 10 km/h. What fare should your taximeter register?
distance fare
parking fee
rate lei/km
starting price

What do you understand by vigilance as an element of defensive behavior?
the driver's ability to adapt his driving style to the weather conditions
the driver's ability to be constantly attentive and prepared to intervene promptly in the event of obstacles
the driver's ability to constantly be alert to potential hazards from customers
the driver's ability to constantly pay attention to the on-board equipment and the operation of the vehicle

In which of the following places is the U-turn maneuver of a car prohibited?
in places where the solidity of the roads does not allow it
less than 50 meters from public transport stations
on national roads
on public roads with steep slopes, signalized as such

The calculation of the price of taxi transport may be done in two ways:
In none of the above cases, each operator sets a day and a night tariff
normal S - hourly tariff (lei/hour) when driving below the switching speed, and the distance tariff (lei/km) when driving at a speed higher than the switching speed or tariff D - double application of the tariff whereby the tariff is calculated by simulta
normal T, application of the hourly tariff throughout the journey or normal B, application of the distance tariff throughout the journey
normal V, simultaneous application of the starting fare and the hourly fare (lei/hour) throughout the journey or normal X, starting fare plus distance fare throughout the journey

The taxi driver's fairness is demonstrated by:
giving priority to other vehicles in heavy traffic
issuing and handing over the tax receipt on the basis of which the fare will be collected

promptness of arrival at the requested destination
warning passengers about certain less serious colleagues

In order to practice passenger transport as a taxi, the driver must hold a valid category B driving license with at least 2 years of experience and:
be at least 25 years old
be medically and psychologically fit
have at least one year of management experience
to present a diploma of completion of at least 10 classes

In which of the following situations are dispatch services mandatory?
in all cities/villages
in all cities/villages where more than 75 authorizations have been assigned
in cities/villages where more than 100 taxi authorizations have been assigned
in cities/villages where more than 50 taxi authorizations have been assigned

The taxi dispatch activity may be performed by an operator:
only within the area of authorization
outside the area of the city/village of authorization
throughout the country
within the area of the city/village of authorization and in the immediately neighboring cities/villages

The aquaplaning phenomenon generates the following hazards:
increasing tire-to-ground adhesion
loss of control over steering and braking
reducing engine capacity
water spraying on the windshield

What are the factors that increase the degree of risk in urban traffic?
a very large number of taxis
high values of car and pedestrian traffic, with multiple cross-roads of their flow
the complexity and lack of knowledge of the street network
the existence of public transport

In order to avoid glare at night, when meeting another vehicle traveling from the opposite direction with the high beam on, you should look first:
always in front
can avoid glare by following the marking that separates the directions of traffic in the diffusion area of the light beam of the headlights of the vehicle traveling in the opposite direction
no matter where, but in no case should the gaze be directed towards the headlights of the person driving in the opposite direction
towards landmarks on the right side of the road, and in depth, at the limit of the light beam of the headlights of the vehicle traveling in the opposite direction

The certificate of professional competence is valid:
5 years with a review for visa every 2 years
5 years with annual visa
for an unlimited period without the need for a periodic visa
provided that the driver is medically and psychologically fit to transport passengers

What is the taxi authorization according to Law no. 38/2003:
authorization issued by the financial administration for the installation of the taximeter device
authorization issued by the police based on the driver's license
certified copy of the taxi transport authorization
operating authorization issued by the city hall

What do you do at night when another vehicle is approaching from the opposite direction?
drive as far to the right of the road as possible at low speed with your parking lights on
Drive carefully, leaving your parking lights on so as not to blind the driver approaching from the opposite direction
reduce speed and turn on the dipped headlights
turn on your parking lights and follow the markings that separate the traffic lanes

For the purposes of Law no. 38/2003 the term of time actually worked is defined as follows:
the duration of a working day
the time interval between the start of the first ride and the end of the last ride
the time interval from the first ride to the last one minus the waiting time
the time interval in which a ride was performed

You have very strong doubts that your taximeter is not working at normal parameters, the records and reports contain errors. Who should you contact to make complete checks?
at the territorial agency of the Romanian Automotive Registry - RAR to which you belong
at the territorial agency of the Romanian Road Transport Authority - ARR to which you belong
at the Territorial Labor Inspectorate
at the territorial representation of the Romanian Bureau of Legal Metrology

What documents must be included in the badges issued at the same time as the taxi authorization and the certified copies?
all data from the other points
name of the transport operator
the city/village of authorization and the cities/villages where access is permitted
the registration number of the vehicle for which the taxi authorization was issued or a certified copy

The starting price must be:
equal to the distance tariff
expressed in lei/hour
higher than the distance tariff
lower than the distance tariff

To take the exam to obtain the certificate of professional competence, the driver must present:
certified copy of the taxi authorization
driving license category B
proof of completion of a professional training course for practicing passenger transport in a taxi
taxi authorization

What dimensions must the double checkered stripe, alternating black and white, on the horizontal median line of the body be?
10 cm x 10 cm
3 cm x 3 cm
5 cm x 5 cm
7.5 cm x 7.5 cm

The daily closing report will include at least the following information:
the number of each ride made
the total amount collected and the VAT amount
total distance in km and total distance with passengers in km
total distance in km, total distance with passengers in km, total amount collected, VAT amount and number of each ride made

What insurance do you need for transport of passengers by taxi?
CASCO insurance and luggage insurance
motor third party liability insurance and insurance of passengers and their property
motor third party liability insurance and personal insurance
third party liability insurance and luggage insurance

What hazards may be generated by stopping the vehicle on the side of the road, in a place where this maneuver is allowed?
even if the maneuver is permitted, the driver is obliged not to leave the vehicle while it is stopped on the side of the road
stopping can also represent a process of adapting the mode of travel in relation to the characteristic situation of road traffic, so by its nature it does not present any danger
stopping on the side of the road may constitute an inconvenience to other traffic participants
stopping under the given conditions cannot represent a hazard to other traffic participants

The taxi lamp model is approved by:
General Directorate of Infrastructure and Road Transport
National Roads Administration
Romanian Automotive Registry - RAR
the Ministry of Interior through the Traffic Police Directorate

---

What conditions are imposed for the taxi lamp, according to the provisions of Law no. 38/2003?
yellow and be provided with an additional green and red lamp
yellow color, dimensions 20 cm x 10 cm x 5 cm
yellow in color and have the word TAXI on the front and back
yellow in color and have the word TAXI on the sides and front

---

In accordance with the provisions of Law no. 38/2003 the list inside the taxi with information regarding the taxi authorization holder, distance, parking and starting rate during the day and at night, must also contain:
driver's photo
stamp of the town hall of the city/village of authorization
the driver's name and surname, as well as the series and number of the professional certificate
the stamp of the taxi company or independent taxi driver

Dispatch services are mandatory for all taxis of authorized carriers operating in a city/village, except:
cities/villages that do not exceed 50,000 inhabitants
cities/villages where less than 100 taxi authorizations have been assigned
independent taxi drivers regardless of location
taxi companies that do not have more than 10 taxi cars

Which of the following statements regarding the wearing of seat belts by taxi drivers, corresponds to the provisions of Law no. 38/2003?
it is mandatory for the occupied operating position of the taxi
it is mandatory in all cases
it is mandatory in the free, occupied and private operating positions of the taxi
it is mandatory when it circulates without a customer and optional in other cases

---

Changing the rate or VAT rate in the taximeter device before obtaining the daily tax clearance report is:
a control function of the taximeter device, used only by the control bodies, authorized to carry out control over them
a prohibited function of the taximeter device, modifications before obtaining the daily fiscal report, constituting a serious misconduct
an optional function of the taximeter device
current and mandatory function of the taximeter device, the taxi driver being obliged by law to make changes before obtaining the daily fiscal report

Vehicles intended for taxi transport must be owned by the taxi company or independent taxi driver:

by title (deed) of property or leasing contract
only by title (deed) of property
with a commodate contract
with a rental contract

If the taximeter device operates in normal calculation mode S, the taxi driver can add:

additional fee for a ride with more passengers
additional fee for choosing the shortest possible route
additional fee for handling the customer's luggage, if applicable
additional fee for prompt arrival at the address requested by the dispatcher and transmitted to the taxi driver

The switching speed is:

the speed at which the taximeter switches from distance fare to km/hour fare
the speed at which the taximeter switches from the free position to the occupied position
the speed limit at which the taxi travels, below which the taximeter device automatically switches the distance traveled pricing to the time consumed pricing
the speed of the vehicle in the city/village

When does the parking rate apply?

applies only at night and only when you are stationed with a client
It only applies outside the authorization area, when you are running with a client below the switching speed
when you are standing around waiting for customers
when you are stationed with a client but also when you are running with a client below switching speed

The ride number, starting fare, distance fare, distance traveled (km) must be included in:

customer receipt
daily activity report
tax report
the list inside the taxi car

The following is mandatory for metrological verification:

metrological analysis bulletin
metrological attestation certificate
metrological verification certificate
model approval for the taximeter device

The taxi authorization may be suspended for a period of 1-3 months for:
the authorization has been withheld 2 times in the last 12 months
the authorization was obtained based on false documents
the driver did not have his professional certificate stamped on time
the validity of the periodic technical inspection of the vehicle has expired

---

When passing through undirected cross-roads within the city/village, the speed must be:
30 km/h
40 km/h
50 km/h
since there is no regulated speed limit, it must be reduced to the limit of avoiding any danger

---

If visibility is reduced below 100 m in conditions of fog, torrential rain, heavy snowfall, the traffic speed in cities/villages must be:
30 km/h
40 km/h
50 km/h
since there is no regulated speed limit, it must be reduced to the limit of avoiding any danger

---

If visibility is reduced below 100 m in conditions of fog, torrential rain, heavy snowfall, the speed of traffic outside cities/villages must be:
30 km/h
40 km/h
50 km/h
since there is no regulated speed limit, it must be reduced to the limit of avoiding any danger

---

The taxi authorization is:
certified copy of the certificate of professional competence
certified copy of the operating authorization
certified copy of the registration certificate
certified copy of the taxi transport authorization

Together with the taxi authorization and any certified copy, the following is issued:
dispatch authorization
operating authorization
the certificate of approval
two badges with the same validity as the taxi authorization

The lack of badges issued with the taxi authorization and any certified copy on board of the taxi car leads to:
criminal fine

suspension of the taxi authorization for a period of 1 to 3 months
withholding the taxi authorization for an unlimited period
withholding the taxi authorization until proof of the existence of the badges is provided

In order to transport passengers as a taxi, the driver must have a valid category B driving license, with a driving record of:
minimum 1 year
minimum 2 years
minimum 3 years
minimum 6 months

If during the ride it is found that the values in the fiscal module of the taximeter device have stopped being recorded, the taxi driver will request:
paying for the service by making an estimate of the remaining amount to be collected plus the amount displayed by the taximeter device
payment for the service within the limit of the value displayed by the taximeter device with the customer's transport to the destination
payment of the service within the limit of the value displayed by the taximeter device, plus an amount established by mutual agreement between the passenger and the taxi driver for the rest of the journey to be made
the taxi driver is obliged to stop the car, collect the amount displayed by the taximeter device, and then the passenger can reach their destination in another taxi car

To control a skid, you will need to:
brake the vehicle progressively
do not accelerate, do not brake and counter-steer the wheels
do not accelerate, brake progressively and do not turn the wheels
turn the steering wheel until the steered wheels become parallel to the longitudinal axis of the vehicle

Being a defensive driver means:
drive at a constant speed
to anticipate situations that could become dangerous
to respect traffic rules on public roads
to warn other traffic participants about the mistakes made

The order of intervention for providing first aid to a person who has suffered multiple injuries is:
clearing the airways, stopping bleeding, immobilizing fractures
immobilizing fractures, clearing the airways and stopping bleeding
it doesn't matter
stopping bleeding, clearing the airway and immobilizing fractures

For taxi cars, the useful trunk volume, the equipment with air conditioning, the existence of airbags for the front passenger/rear passengers are mentioned in:

certified copy of the taxi authorization
taxi authorization
the certificate of approval
the vehicle's identity card

By stopping distance we mean:
braking distance to stop
the distance traveled between the moment the obstacle is detected and the brake pedal is pressed
the distance traveled from the moment the brake pedal is pressed until stopping
the sum of the reaction distance and the braking distance

The taxi authorization obtained for the first time for a vehicle will be extended:
for 10 years with annual visas
for 3 years provided that the vehicle does not exceed 200,000 km traveled
for an unlimited period, provided that the vehicle complies with the safety regulations in force
upon request, only once for 5 years, if at that moment the vehicle does not exceed 10 years from the date of manufacture

The taxi authorization is:
transferable from one company to another
transferable from one vehicle to another
transmissible from one individual to another
unique and non-transferable

In order to practice the transport of passengers by taxi, the driver must not have had the right to drive motor vehicles suspended for driving under the influence of alcohol or narcotics or for involvement in accidents resulting in victims, due to their fault, in the last:
12 months
3 months
6 months
9 months

The taxi authorization may be suspended, along with the associated badges, for:
delay of more than 15 days in the annual endorsement of the certificate
payment for the taxi service was not made based on the properly issued customer receipt
the impossibility of proving the existence or validity of the badges
when the vehicle is owned under a lease agreement

The insurance of passengers and their goods for the risks that fall under the responsibility of the authorized carrier must be:
at the authorized transport operator headquarters
at the vehicle owner's headquarters/domicile

on board the vehicle
to the licensing authority

Which of the following sanctions applied to the employee is correct:
disciplinary termination of the individual labour contract
suspension of the individual labour contract for a period of 3 – 6 months
unpaid for a period of 1 - 3 months
verbal warning

The taxi authorization may be withdrawn in the following cases:
if the driver does not hold a professional certificate or the certificate has expired
the payment was not made based on the customer receipt
the transport is carried out without payment documents
the validity of the periodic inspection has expired

It is prohibited to transport passengers by taxi:
occasionally, between the city/village of authorization and other cities/villages across the border
occasionally, between the city/village of authorization and other cities/villages or points of interest
on fixed routes, pre-established by the taxi driver, which go beyond the city/village of authorization
permanently, within the city/village of authorization

Theft of items from the vehicle is common:
at fuel stations
in big cities
in the presence of the client
in the taxi company garage

To control a skid you will need to:
brake and steer in the opposite direction to where the vehicle skidded
brake progressively
stop accelerating, do not brake and steer smoothly in the direction in which the vehicle skidded
turn the steering wheel in the direction in which the vehicle skidded

Why is it necessary to keep a much greater distance from vehicles driving in front after a torrential rain:
because the stopping distance is much longer (almost double that of a dry road)
because visibility is reduced
in such conditions there is no danger
the safe stopping distance does not change compared to a dry road

The metrological verification bulletin for the taximeter device must be found:

at the taxi driver's home, in original
at the taxi operator's headquarters, in original
on board the vehicle, in copy
on board the vehicle, in the original

The approval certificate for the taxi car, issued by RAR for 10 years, valid with an annual visa, will be found on board of:
in a copy conforming to the original
in copy
in legalized copy
in the original

The driving license may be withheld:
for committing repeated infringements
upon accumulation of at least 10 penalty points in one year
upon change of marital status
when the expiry date has passed

In order to practice passenger transport as a taxi, the driver must hold a valid category B driving license, with at least 2 years of experience and:
be at least 25 years old
be medically and psychologically fit
have at least one year of driving experience
to present a diploma of completion of at least 10 classes

What is the normal length of working time per day:
10 hours
12 hours
6 hours
8 hours

The taxi transport authorization is issued for a duration of:
5 years old
5 years with annual visa
for a year
indefinite and is valid with a 5-year visa

Which of the following documents must be on board of, in original:
taxi authorization
taxi licence
transport authorization
transport license

The taxi authorization may be suspended, along with the associated badges, for:
1-3 months

30 days
definitive
one year

Leaving the scene of an accident, without permission, by the driver of any vehicle involved in an accident resulting in the death or bodily injury or health of one or more persons is punishable by:
fine and cancellation of driving license
imprisonment and cancellation of driving license
only a criminal fine
only prison

The taxi authorization may be withdrawn if:
are other information than the legal ones displayed on the taxi light box
is used for a vehicle other than the one for which it was assigned
the legal provisions regarding the pricing of the service are violated and it disadvantages the client
the validity of the periodic inspection has expired

What is the part of the road on the itinerary you have to travel on that you must drive carefully:
the entire itinerary
the part that crosses mountain areas, with serpentines
the section with heavy traffic
urban traffic part

The cancellation of the driving license is ordered when:
the holder was definitively sentenced to the complementary punishment of prohibition from exercising the profession or occupation of driver
the owner has changed his name
the police authorities consider it necessary
was suspended three times

What is the maximum working time per week:
36 hours
40 hours
48 hours
50 hours

What are the component parts of a mobile radio transceiver station:
microphone-transmitter and antenna
mobile phone, microphone and antenna
taximeter, microphone and antenna
the transceiver itself, microphone and antenna

The transport of passengers by taxi on fixed routes, pre-established by the taxi driver, which go beyond the city/village of authorization, is:
forbidden
mandatory
permissive
recommended

In the absence of customer waiting areas, taxis can park:
on the entire road surface
only in designated parking lots
only in places allowed for vehicles
only on sidewalks

It is prohibited to transport more than:
1 client, as defined in art. 6 letter e of Law no. 38/2003
2 clients
3 clients
4 clients

The client is:
all passengers in the taxi who pay for their transport separately
every passengers in a taxi
only the person who rent a taxi directly from the station
the person who hired, directly or through a dispatcher, the transport of passengers and pays the entire amount written in the customer receipt

---

The cost of the transport of passengers by taxi may be assessed based on:
distance traveled and time elapsed
number of passengers transported
the condition of the roads on which the ride is run
type of goods transported

The general rules regarding how to set the rate are:
number of passengers transported
the degree of difficulty of the route
the distance tariff, lei/km and the time tariff, lei/hour, depending on the technical characteristics and the maximum authorized transport capacity of the respective vehicles
the level of comfort in the case of goods transport

The liability of the independent taxi driver for the damages caused to clients during transport, due to his fault, is:
covered only by CASCO insurance
integral
joint with the client
jointly and severally with the operator to which it is affiliated

Equipping the vehicle with sound devices to signal the reversing maneuver is
forbidden
mandatory
not provided for by law
recommended

When driving a vehicle through the rain, defensive behavior requires taking measures such as:
all the other measures listed, plus increased attention and anticipation of dangerous situations
just reduce speed, throughout the rain
only using the rear window and windshield defogger
to maintain a greater distance from the vehicle behind, compared to the distance considered sufficient on a dry road

What are the main sanctions?
confiscation of the vehicle
prison
the warning and the fine
vehicle immobilization

A fractured upper limb is immobilized:
in such a way that the fractured bone, the lower joint and the upper joint are included
next to the fractured bone
so as to encompass both the fractured bone and the lower joint
with the help of a tourniquet, above the fractured bone

In the spirit of defensive behavior, drivers must adapt their vehicle speed depending on:
atmospheric conditions, road condition, traffic intensity and vehicle load
road condition
their health status
traffic intensity

For employees employed on a regular basis, the entire normal duration of working time per day is:
10 hours
12 hours
6 hours
8 hours

The maximum legal duration of working time per week, for full-time employees, including overtime, cannot exceed:

40 hours
44 hours
46 hours
48 hours

The issuance of the approval certificate for vehicles intended for the transport of passengers or goods as taxis is carried out by:
ARR
Local administration
police
RAR

The taxi driver is obliged to ensure the protection of the client:
from the moment the order is placed
legally has no obligation
while he was next to the taxi
while it is in the taxi

Which of the following sanctions applied to the employee is correct:
disciplinary termination of the individual labour contract
suspension of the individual labour contract for a period of 3-6 months
unpaid for a period of 1 - 3 months
verbal warning

What are the types of mandatory insurance:
CASCO insurance
motor third party liability insurance, passengers and baggage insurance
only life insurance
only motor third party liability insurance

The factors that negatively influence the physical and mental state of the driver are:
alcohol, fatigue, contraindicated medications and drugs
only alcohol consumption
only night driving
only prolonged efforts

The individual labour contract may be suspended:
not
under no circumstances
yes, but only with the consent of the parties
yes, by agreement of the parties or by unilateral act of one of the parties

If the employee commits a disciplinary offense, the employer is prohibited from applying to him/her:
demotion from position

disciplinary fines
disciplinary termination of the individual labour contract
the written warning

The individual labour contract is terminated:
based on the consent of the parties, in verbal form, in the mother tongue
based on the consent of the parties, in writing, in the Romanian language
based on the employer's consent in verbal form, in Romanian
with the consent of the employee only, in writing, in the mother tongue

Any employee who performs work benefits from:
all the benefits listed in the other options and in addition, respect for his dignity and conscience
occupational health and safety
social protection
working conditions appropriate to the activity carried out

Which of the following causes makes a vehicle's steering wheel feel heavy?
high pressure pump failure (power steering)
too high pressure in the front tires
too much play in the joints
unadjusted wheel toe-in

Vigilance is:
a component of preventive conduct
a disciplinary sanction
a duty stipulated in the traffic regulations
a statutory obligation

The driver must perceive everything while driving:
only by hearing
only by sight
only by touch
through the 3 senses from the other three variants, plus the sense of smell

The reaction time (the interval between the moment a signal appears and the actuation of a machine command) is:
0.5 - 1.5 seconds
2 seconds
3 seconds
4 seconds

Fatigue, as the main risk factor in driving, is determined by:
all the factors listed in the other variants, plus the overload of the nervous system and the monotony of the road

driving a car for a long time
only from insufficient rest before departure
only from the physical and mental efforts of the days before departure

Defensive driving measures in the fog:
avoiding stops on the road and overtaking
speed reduction
take all the measures listed in the other options and even interrupt the journey, going off the road, if the fog is very dense
using fog lights

The expression "foreseeable obstacle" means:
an obstacle appeared during actual braking
an obstacle occurred during reaction time
the obstacle (sign) observed at the limit of the driver's field of vision
the obstacle (signal) that could appear beyond the end of the visibility segment, which the driver intuits (a pothole after a curve, a vehicle traveling in the opposite direction after a ramp top, etc.)

The role of ensuring that, after making a turn, the steering wheels return to their initial position is played by:
angle of incidence
divergent adjustment of the drive wheels
the angle of departure
wheel toe-in angle

Cars intended to carry out transport for rent are prohibited from being equipped with:
audible warning devices when reversing
radio
taximeter devices and/or radio transceivers
tinted side windows

The technical inspection of vehicles intended for the transport of passengers or goods as taxis is carried out:
annually, at a technical inspection station authorized by MTI
at most 6 months in a technical inspection station authorized by RAR
at most six months, in a technical inspection station of the Ministry of Internal Affairs
only when the technical condition of the vehicle requires it

Which of the following acts constitutes a crime?
driving a vehicle on public roads by a person with an alcohol level exceeding 0.70 g/l of blood alcohol
failure to carry out the periodic technical inspection within 10 days of expiry
failure to stop at the police officer's signal

putting into circulation an unregistered trailer

Leaving the scene of the accident, without the consent of the police or the prosecutor conducting the investigation, by the driver of any vehicle involved in an accident resulting in the death or bodily injury or health of one or more persons is punishabl

criminal fine and cancellation of driving license
imprisonment and cancellation of driving license
only a criminal fine
only prison

The taxi driver's fairness is demonstrated by:

choosing the longest route without potholes
civilized behavior and by respecting the legal requests of customers
giving priority to other vehicles in heavy traffic
warning passengers about weather changes

In the case of passenger transport by taxi, the total cost of a ride has the following elements:

double fare, simultaneous distance-time and total cost of the service performed
the starting fare, the cost per distance depending on the programmed fare per kilometer and the cost per time spent stationary
the starting fee and the cost of the service performed and the equivalent value of the fuel consumed
the starting fee and the doubled cost of time spent in stationary

---

The working positions of the taxi lamp "Liber/Free" and "Ocupat/Occupied" must have a visible counterpart on:

car windshield
on board of the car
the display of the taximeter device
the receipt issued to the customer

The liability of the transport operator or independent taxi driver for damages caused to customers during transport due to his fault is:

fully and is covered by civil liability insurance (RCA)
partial and insured with CASCO
partial and is covered based on civil liability insurance (RCA)
total and is insured only in the event of a traffic accident

As a precaution, before setting off on a race, the driver must not neglect checks regarding:

fluid level
lights, levels, signaling, wheels and brakes

signaling and brakes
the existence of an identity card on board

Foresight, as a component of defensive driving is:
attentive and diminished
concentrated and distributive
immediate and distant
stable and mobile

Judgment is one of the component elements of:
civilized driving
driving within the legal limits allowed
preventive driving
theoretical and practical knowledge

Promptness, speed, selectivity and accuracy are important attributes of:
alertness
judgment
leadership skills
skill

Skill in driving vehicles on public roads is a component of:
curriculum
preventive conduct
promptness and skill
theoretical and practical knowledge

Vision is the primary sense through which the driver receives traffic information in proportion to:
0.6
0.7
0.8
0.9

The duration between the moment of observing an obstacle and the moment of applying the brake, called reaction time, is usually evaluated at:
1 second
2 seconds
3 seconds
5 seconds

If that form of friction between the tire and the road surface, called adhesion, is low, the vehicle's stopping distance:
decrease

does not change
increase
vary

Aquaplaning, the loss of contact between the tire and the road surface, occurs on a road:
with a layer of water or melted snow
with a pronounced slope
with an irregular geometry
with pronounced unevenness

The phenomenon of aquaplaning may be counteracted by:
gradual reduction of speed, without sudden use of the brake
judicious use of braking equipment
reducing tire pressure
simultaneous use of engine and service brakes

Does the phenomenon of aquaplaning only occur at very high speed levels?
can also occur at moderate speeds, if the depth of the tread grooves (channels) is less than the depth of the water or melted snow on the roadway
exclusively
never at speed limits
yes

Is there any relationship between vehicle speed and the driver's visual perception?
not
yes, both speed and perception increase proportionally
yes, increasing speed reduces the field of visual perception
yes, only in conditions of reduced visibility

What is meant by field of view (visibility)?
central view on the road axis
peripheral vision without the driver having to turn their head
seeing the space to the left or right of the road by turning the body
the sight aimed straight ahead

Is driving at a too low speed dangerous for the traffic?
not
only on steep slopes
yes, because it forces other drivers to change lanes, or engage in risky overtaking
yes, only on a one-way road

Entering the highway, from a side road through a road junction, is done on the lane:
acceleration, increasing speed before entering the current traffic flow
acceleration, reducing speed until possible collisions are avoided

intended for emergency hospitalization
intended for slow vehicles

Is there any relationship between speeding and car operating costs?
not
only on highways
yes, only on roads with varied geometry
yes, the brakes, gearbox, clutch and suspension wear out prematurely, and fuel consumption increases significantly

Failure to maintain an appropriate distance from the vehicle in front of him on the highway is considered:
a highly experienced pilot
reckless by reducing the possibility of maneuvering to avoid accidents
safe at the wheel
that he drives in a sporty style

How many seconds is the distance that must be maintained between 2 vehicles traveling at up to 60 km/h on the same lane on a dry road evaluated?
2 seconds
3 seconds
4 seconds
5 seconds

The distance that must be maintained between 2 vehicles, driving at 60 km/h on the same lane of dry asphalt, is evaluated at 2 seconds. Are there situations in which this value should be modified?
not
only at a speed of over 100 km/h
the figure remains unchanged
yes, at a speed of over 60 km/h, one second is added, and if the weather is unfavorable, another one is added

By driving too close to the vehicle in front, a driver joins the ranks of those who:
I drive cautiously
I drive in a relaxed and comfortable manner
is based on a wealth of experience in management
take risks and arrive at their destination very tired

While driving on a road with markings, the vehicle, whose maximum width must not generally exceed 2.55 m, will be positioned:
as close to the center of the traffic lane as possible
as close to the road axis as possible
as far left as possible of the traffic lane

as far to the right of the traffic lane as possible

Correct adjustment of the driver's seat, rearview mirrors and seat belts are:
mandatory norms, punishable by fine
measures taken in accordance with preventive conduct
recommendations of the road authority
recommendations that should be made to the public administrator

---

In the event of a tire explosion in the front of the vehicle, the driver will:
brake suddenly
let go of the steering wheel
will perform an engine brake, and after slowing down it will brake gently when stopping
will turn the steering wheel in the opposite direction of the vehicle's movement

---

How many types of skidding are known?
when accelerating, cornering and braking
when changing gear ratios suddenly
when climbing steep ramps
when descending steep slopes

While driving, the correct position of the hands on the steering wheel, in relation to the circular dial of a watch, is:
left hand at 10 o'clock and right hand at 4 o'clock
left hand at 12 o'clock and right hand at 3 o'clock
left hand at 12 o'clock and right hand at 6 o'clock
left hand at 9 o'clock and right hand at 3 o'clock
